

Cookie Policy

What Are Cookies?

Cookies are small text files that may be stored on your computer, tablet, phone or other device when you visit a website.

Cookies may, for example, be used to ensure that a website functions correctly, to remember a logged-in session, to retain the contents of a shopping cart, or to remember certain preferences during a visit.

In addition to cookies, websites may use similar technical mechanisms, such as local browser storage. Where this policy refers to cookies, it also includes such comparable technologies where applicable.

Which Cookies Do We Use?

Technorama LLP aims to use only cookies and similar technologies that are necessary for the operation, security and proper functioning of our websites and online services.

Depending on the relevant website or service, the following types of cookies may be used.

Functional and Necessary Cookies

These cookies are necessary for a website or online service to function properly.

They may include cookies used for:

- maintaining a logged-in session;
- security and fraud prevention;
- remembering the contents of a shopping cart;
- storing technical preferences;
- enabling forms or other website functionality.

Prior consent is generally not required for cookies that are technically necessary.

Analytical Cookies

On certain websites, we may use analytical cookies or similar technologies to gain insight into the general use and functioning of a website.

These data may, for example, be used to determine which parts of a website are visited and to identify technical issues or areas for improvement.

Where analytical cookies have only a limited impact on privacy, applicable law may permit their use without prior consent.

Tracking and Advertising Cookies

Technorama LLP does not routinely use cookies to track visitors across different websites or to create personal advertising profiles.

If a specific website or service uses cookies or similar technologies for which prior consent is legally required, those cookies will not be placed before valid consent has been obtained.

Where applicable, consent that has been given may subsequently be withdrawn.

Personal Data

In certain circumstances, cookies may contain or generate information that is considered personal data, for example where an identifier can be linked to a user, account, device or other information.

Where personal data is processed through the use of cookies, our Privacy Policy also applies.

Personal data is shared with third parties only where this is necessary for the performance of an agreement, required by law, or supported by another valid legal basis.

Our Own Infrastructure

Technorama LLP manages a large part of its websites, servers, software and technical infrastructure itself.

We aim to avoid external scripts, fonts, software libraries and other third-party technical resources as far as reasonably possible where these are not necessary for the operation of our services.

The cookies actually used may differ between websites and online services.

Disabling Cookies

You can use your internet browser settings to delete cookies or to block their use in whole or in part.

Please note that certain websites or online services may then no longer function correctly or completely.

This applies in particular to features such as:

- logging in;
- shopping carts;
- stored preferences;
- secure parts of a website.

Changes

Technorama LLP may amend this Cookie Policy when our websites, services or applicable laws and regulations change.

The most recent version of this policy will be made available through our websites.

Contact

If you have any questions about the use of cookies or the processing of personal data, please contact us.
